We are interpreting **Items 1, 2, 3, 4, 5, 8, and 9** of your request primarily as requests for intelligence records on yourself. For reasons described below, we are not able to confirm or deny the existence of intelligence records on any and all individuals who request them.

NSA collects and provides intelligence derived from foreign communications to policymakers, military commanders, and law enforcement officials. We do this to help these individuals protect the security of the United States, its allies, and their citizens from threats such as terrorism, weapons of mass destruction, foreign espionage, international organized crime, and other hostile activities. What we are authorized to do, and how we do it, is described in Executive Order 12333. Information about how NSA conducts signals intelligence activities is available on the websites of NSA ([www.nsa.gov](http://www.nsa.gov)) and the Office of the Director of National Intelligence ([www.dni.gov](http://www.dni.gov)).

To respond to your request, NSA would have to confirm or deny the existence of intelligence records on you. Were we to do so in your case, we would have to do so for every other requester. This would enable, for example, a terrorist or other adversary to file a FOIA request with us in order to determine whether he or she was under surveillance or had evaded it. This in turn would allow that individual to better assess whether they could successfully act to damage the national security of the United States. For such reasons, we can neither confirm nor deny the existence or non-existence of the records you requested.

The FOIA exempts several categories of information from disclosure. Its first exemption indicates that it does not apply to matters that are authorized by Executive Order to be kept secret and properly classified in the interest of national defense or foreign relations. The fact of the existence or non-existence of intelligence records on any individual, including yourself, is an appropriately classified matter. Paragraph 3.6(a) of Executive Order 13526 ("Classified National Security Information") specifically authorizes this type of response, also known as a Glomar response, to such requests made under the FOIA.

Moreover, the third exemption under the FOIA authorizes the withholding of information specifically protected from disclosure by statute. The fact of the existence or non-existence of records responsive to your request is currently exempted from disclosure the following statutes: Title 18 U.S. Code 798; Title 50 U.S. Code 3024(i); and Section 6, Public Law 86-36 (50 U.S. Code 3605).

To the extent that your request covers information that you believe is subject to the Privacy Act, it provides that records subject to withholding under the first exemption of the FOIA are also exempt under (K)(1) exemption of the PA. The statutes cited above also apply to permit the withholding of this type of information if sought under the PA.

Please be advised that this is our standard response to all requests where we reasonably believe intelligence records are being requested on an individual. If we have misinterpreted your request and you are seeking non-intelligence records (an individual, for example, may request records about any relationship he or she may have had with the Agency as an employee, military service member, applicant, or visitor), you may submit a signed Privacy Act request explaining what type of non-intelligence records that this Agency may have maintained on you. If you provide a Social Security number, it will assist us with the search for such records. The authorities for collecting this

information and its use are set forth in the Privacy Act Statement provided below.

In **Items 1, 2, 3, 4, 5, 7, 8, 9, and 10** of your request, you appear to be asking for records possibly held by other federal agencies, the State of Illinois, research institutions, and academic institutions. In these instances, since you do not appear to be seeking records created or controlled by NSA, a search for responsive records would not prove productive. We recommend that you contact the FOIA offices at DARPA, CIA, NASA, State Department, FAA, DIA, the United States Air Force, as well as the Department of Defense as they potentially may have information you are seeking. You would also need to contact the specific academic institution or research organizations directly to request records.

The National Security Agency/Central Security Service (NSA/CSS) is the nation's cryptologic organization, and we have a twofold mission. Our Information Assurance mission is to provide solutions, products, and services to protect U.S. information infrastructures critical to national security interests. In response to requirements set at the highest levels of government, our Signals Intelligence mission is to collect, process, and disseminate intelligence information from foreign signals for national foreign intelligence and counterintelligence purposes. As part of our intelligence mission, you may be aware that one of the NSA/CSS missions is to collect, process, and disseminate communications or signals intelligence information for intelligence and counter intelligence purposes. NSA is authorized to engage in these activities in order to prevent and protect against terrorist attacks, the proliferation of weapons of mass destruction, intelligence activities directed against the United States, international criminal drug activities, and other hostile activities directed against the United States. The activities that you describe in **Items 1, 6, and 10** of your request such as "...RFID chips, and Nanotechnology implantations, EMF RF Microwave Scalar-Directed Energy Weapons Used and rested upon me..." and "Behavior Modification" do not fall within this Agency's missions, and as such a search would not prove productive.

Finally, in **Items 5 and 9** of your request, you request contract information pertaining to NSA's research activities with other federal and private laboratories. This portion of your request has been reviewed by this Agency as required by the FOIA, and is being fully denied in accordance with Executive Order 13526, as set forth in Subparagraphs (e) and (g) of Section 1.4. This request is denied because disclosure could reasonably be expected to cause damage (at minimum) to the national security, per Executive Order

FOIA Cases: 105580  
105582, 105584,  
105651, and 105653

13526, Section 1.2. Any responsive material that may exist would be deemed currently and properly protected; therefore, exempt from disclosure pursuant to the first exemption of the FOIA (5 U.S.C. Section 552(b)(1)).

In addition, this Agency is authorized by various statutes to protect certain information concerning its activities. Accordingly, your request is also denied pursuant to the third exemption of the FOIA, which provides for the withholding of information specifically protected from disclosure by statute. The specific statute applicable in this case is Section 6, Public Law 86-36 (50 U.S. Code 3605). No portion of any responsive material is reasonably segregable.

Please be advised that due to security concerns, this is our standard response to all requests where we reasonably believe acquisition records are being sought on a contract or contract related activity.

You may appeal this decision in whole or part. If you decide to appeal, you should do so in the following way. NSA will endeavor to respond within 20 working days of receiving your appeal, absent any unusual circumstances.

- The appeal must be sent via U.S. postal mail, fax or electronic delivery (e-mail) and addressed to:

State-by-State Guide to Schools that Hold DHS and NSA CAE-CD Designations  
The National Security Agency (NSA) and the Department of Homeland Security (DHS) created the National Centers of Academic Excellence in Cyber Defense (CAE-CD) program as a way to recognize and grant designations to schools that offer rigorous degree programs in information security.

Through this jointly sponsored program, the NSA and DHS work together to promote higher education and research in cyber defense. The NSA and DHS recognize that the ultimate goal of higher education and research in cyber defense is to produce professionals capable of defending against the increasingly complex nature of cybercrime and intrusion in both government and industry.

SPONSORED  
Featured Programs:

Syracuse University's College of Engineering and Computer Science offers a Master of Science in Cybersecurity program delivered online. The program prepares students with the necessary foundations for the design and development of assured, secure computer systems in order to predict, prevent, and respond to cyber attacks. Bachelor's degree is required. Request Information.

The Centers of Academic Excellence Program Offers Three Distinct Designations  
The CAE-CD program includes the following designations, which are granted to community colleges, campus-based and online colleges and universities, and research institutes:

Center of Academic Excellence in Cyber Defense (CAE-CDE): Granted to universities that offer bachelor's and graduate degree programs relevant to cyber defense

Center of Academic Excellence in Cyber Defense Two-Year Education (CAE-2Y): Granted to community colleges that offer two-year certificate and associate's degree programs related to cyber defense

Center of Academic Excellence in Research (CAE-R): Granted to institutions with

research programs dedicated to cyber defense  
CAE-CD designations are valid for a period of 5 academic years, after which institutions must reapply in order to retain their designation.

Note: The CEA-CD designation program officially replaced the original CEA-IAE (Information Assurance Education) designation in 2014. However, some schools have chosen to retain the original CEA-IAE designation until January 2017, at which time it will officially expire. These schools have the option to reapply for designation under the new CEA-CD program at any time.

Knowledge Units and Focus Areas Required to Earn a CAE-CD Designation  
To qualify for one of the CAE designations, institutions must ensure their programs are closely aligned with specific cybersecurity-related knowledge units, validated by experts in the field.

Programs must include core knowledge units (KUs) on specific topics of study. KUs are specific to the three CAE designations:

Center of Academic Excellence in Cyber Defense Two-Year Education (CAE-2Y) programs:

- Basic Data Analysis
- Basic Scripting or Introductory Programming
- Cyber Defense
- Cyber Threats
- Fundamental Security Design Principles
- IA Fundamentals
- Intro to Cryptography
- IT Systems Components
- Networking Concepts
- Policy, Legal, Ethics, and Compliance
- System Administration

Center of Academic Excellence in Cyber Defense (CAE-CDE) programs:

Includes the KUs of CAE-2Y programs, in addition to the following:

- Databases
- Network Defense
- Networking Technology and Protocols
- Operating Systems Concepts
- Probability and Statistics
- Programming

Center of Academic Excellence in Research (CAE-R) programs:

Must include a core of:

- Principles (e.g., domains, resources, privileges, layering)
- Security Mechanisms/Functionality (e.g., cryptography, virtualization, biometrics)
- Architectures (e.g., network models, critical infrastructure security)
- Assurance (e.g., software, hardware, modeling)
- Operations (e.g., configuration, security automation)
- Analysis (e.g., forensic, data mining, audit)
- Non-technical CD issues (e.g., legal issues, policy issues, privacy)

In addition to one of CAE-CD designations, CAEs have the option of applying for one or more cyber defense focus area designations:

- Cyber Investigations
- Data Management Systems Security
- Data Security Analysis
- Digital Forensics
- Health Care Security
- Industrial Control Systems - SCADA Security
- Network Security Administration

A State-by-State Guide to DHS and NSA Designated Centers of Academic Excellence  
in Cyber Defense  
By attending a CAE program, students know they are completing a program that  
will allow them to make a strong contribution to protecting our nation's  
information infrastructure from cyber-attack. Also, during the hiring process  
employers have more confidence when considering candidates who have graduated  
from schools with a CAE designation.
